

Abdul Moeed Maan

Software Engineer

+92 305 8170159 | abdulmoeedmn@gmail.com | in/abdulmoeedmaan | github.com/AbdulMoeed-Maan47

Education

Bachelor of Science, Computer Science *FAST – National University of Computer and Emerging Sciences, Lahore, Pakistan*

Expected June 2027
CGPA: 3.79 / 4.00

Experience

Teaching Assistant – Software Design & Analysis

January 2026 - May 2026

As a TA, I supported students in understanding system design and applying these concepts in real projects. I guided them about software architecture, process flows and software documentation. I conducted online sessions, guided system design conventions, helped debug code, and evaluated assignments and projects.

Teaching Assistant – Object Oriented Programming Lab

January 2026 - May 2026

As a TA, I guided students in understanding and implementing Object Oriented Programming concepts in C++ in the lab. I conducted sessions, solved students' queries, helped debug code, and evaluated assignments.

Teaching Assistant – Computer Organization & Assembly Language

August 2025 - December 2025

As a TA, I guided students in understanding low level x86 assembly language and mentored them to create a car racing project in x86 assembly. I supported students in understanding extensibility and modularity by scaffolding the final project into manageable phases. I conducted sessions, helped debug code, and evaluated assignments and projects.

Teaching Assistant – Object Oriented Programming

August 2025 - December 2025

As a TA, I guided students in understanding Object Oriented Programming concepts in Python. I conducted sessions, solved students' queries, helped debug code, and evaluated assignments and projects.

Projects

Utility : Peer-to-Peer Service Sharing App

Built an online service sharing app using REACT.js for user-friendly interface, FastAPI for the backend and MongoDB for database management, that allows peers to request and provide services such as plumbing, mechanic, etc. Moreover, it contains AI-powered customer support system that analyzes all the bids on a request and gives a report analysis.

Tripmate – Trip Management and Group Expense Management App

Built an online trip-planning app that includes modules such as car reservation, hotel room reservation, restaurants reservation, etc. beforehand. It also allows users to receive any available discounts. It is also a financial app that offers expense tracking and management by allowing customers to make a party, split the expenses among themselves and generate detailed reports about expenses and trips. Built with REACT.js for frontend, Node.js/Express.js for Backend and MongoDB for database management.

summarizeThis – Chat Summarizer

A Python-based abstractive chat summarization app built using NLTK, Pandas, Numpy, TensorFlow, PyTorch, Scikit-learn on BERT architecture that can summarize long group chats to save time and reduce the feeling of FOMO among social media users.

Grubify – Restaurant Management App

Built an online restaurant management platform using REACT.js for the frontend, Node.js/Express.js for the backend and SQL for database management, including user authentication, inventory management, employee attendance, product handling and real time delivery updates.

Skills

Languages : C/C++, Python, HTML, CSS, JavaScript, Assembly

Databases : MsSql, MongoDB

Frameworks : React, Node

Tools : Git, GitHub, JIRA, PostmanAPI, Figma, Canva, LucidChart, Draw.io

Extracurricular Activities

Volunteer : Volunteered as a PR deputy in SOFTEC in 2023 and as an Infra deputy in VOICE in 2024. I have also volunteered in event management in CBS in 2024.

Public Speaking : Spoken at multiple MUNs and Declamation Contests for the past 5 years.
